Tech Tips re: Function Keys that he suggests.

Mike uses the password generator in Norton Anti-virus for most of his favorite websites and finds it very useful. You can program it to do up to 20 characters. He keeps track of his other passwords on a password protected spreadsheet.

Mike took care of the refreshments and the last meeting, which as usual was a bit of tech and a lot of smiles and laughs. He loves 'Pickles' cartoons and showed a number of them that were related to computers and their owners. Also here are some of the links to the video clips that you will find rather amusing:
