

Vista Royale Computer Club
January 11, 2018 Meeting Information & Links

Members:

President Mike Johnson welcomed 28 members and announced the following which is the information for the sale of used Lab equipment and sign-up sheets are in the Lab. They will be sold at the February 1st meeting. This equipment will be a simple plug & play set-up as they are all neat & clean and also have Microsoft Essentials for anti-virus. The extra monitors for sale will be great for a dual monitor set-up, especially at these extremely low prices. **Signup sheets in the LAB**

These Acer 19.5" screens were used in the Lab; includes a power cord and VGA cord. Has VGA, DVI & audio ports.

Cash only, no support is provided, 'as is' without warranty, no returns

This week Sandy McKenny gave us a look at the Ancestry.com Library Edition subscription webpage which you can access for free from the Lab computers. She did a couple of simple searches to illustrate how you would use them for maximum efficiency. It was a brief 'How to do Genealogy' session for those who have not used the site or needed a refresher.

She also announced that she will be holding a free 2-part beginner class on next Tuesday evening January 16th and continued the following Tuesday, January 23rd in the Lab from 6:30pm to 8:30 pm. This will be open to a max of 12 members. It would be helpful for participants to practice 'copy&paste' and have a thumb drive to use in the Lab. There are extra \$5 ones that you can purchase in the Lab cabinet.

Extra hours in the Lab for Independent Research are Monday 3-5 with Alison Findlay and Wednesday 3-5 with Sandy McKenny.

Our speaker next week will be Vicky Getz who will give us an overview of "Streaming" which many of you have requested. It will include the AT&T App and services included with TV providers, other services streaming services and devices and give you ideas about what is available to you beyond Netflix. This should be a very enlightening session.

Also dues of \$20 cash can be paid any time in the Lab.
